### **DETAILED ACTION**

1. Applicant's Amendment filed December 03, 2003 has been entered. Claims 1 – 6, 13, and 14 have been canceled. Claims 7 and 15 have been amended. Claims 19 – 33 have been withdrawn.
2. This application is in condition for allowance, except for the following formal matter.

### **EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

**Claims 19 – 33 are canceled** for being drawn to non-elected inventions. Election was made without traverse in the Response to the Restriction Requirement filed in July 29, 2003. Applicant has the right to file divisional applications on the subject matter covered by these claims.

### ***Allowable Subject Matter***

4. Claims 7 – 12 and 15 – 18 are allowed.
5. The following is an examiner's statement of reasons for allowance:  
The prior arts teach a thin film magnetic memory device, comprising:

a plurality of memory cells for retaining storage data, wherein each of the memory cells includes an access gate selectively turned ON during reading, and a magnetic storage portion connected in series with the access gate having first and second electric resistance depending on storage data, and the magnetic storage portion includes a first magnetic layer having a fixed magnetization direction, a second magnetic layer whose magnetization direction depends on data stored therein, and a first insulating film formed between the first and second magnetic layers, said thin film magnetic memory device further comprising: a data line electrically coupled to the magnetic storage portion of a selected memory cell through a turned-ON of access gate ...; a reference data line providing read reference voltage for comparison with a voltage on the data line; and a plurality of dummy memory cells for producing the read reference voltage.

However, the prior arts fail to further teach or suggest:

each of the dummy memory cells being provided for every fixed set of the memory cells, wherein each of the dummy cells includes:

a dummy access gate ..., and

a plurality of dummy magnetic storage portions ...,

each of the dummy magnetic storage portions includes:

a third magnetic layer magnetized in a fixed direction,

a fourth magnetic layer magnetized either in the same direction, or in a opposite direction to that of the third magnetic layer, and

a second insulating film formed between the third and fourth magnetic layers, and

each of the dummy magnetic storage portions is connected in series with at least another one of the plurality of dummy magnetic storage portions.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
